**Election/restriction**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to electron emitting device manufacturing apparatus, classified in class 445, subclass 60.
- II. Claims 9-19, drawn to electron emitting device, classified in class 313, subclass 309.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, electron emitting device can be manufactured by an apparatus which deposits a conductive film by sintering a conductive film or by a mechanically depositing by a brush.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, because of their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Ivan Kavrukov on 6-6-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2879

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
